
Job Aid: Assignment Profiles Operators

Purpose

The purpose of the Assignment Profiles Operators job aid is to provide definitions for each operator used within an assignment profile.

Operator:

1. **Matches:** Allows multiple values to be entered. Selected user attribute must exactly match one of the entered values.
2. **Between:** Used to set a numeric or date range.
3. **Contains:** Entered value must be part of selected user attribute.
4. **Is Empty:** Selected user attribute must be null.
5. **Equals:** Allows one value to be entered.
6. **Greater Than or Equal to:** Used to set a numeric value and all values greater than that number.
7. **Include Sub Records Of:** Used to include subrecords, if any, of the selected value.
8. **Less Than or Equal to:** Used to set a numeric value and all values less than that number.
9. **Starts with:** Entered value must be the first part of a selected user attribute.
10. **Does Not Match:** Allows multiple values to be entered. Selected user attribute must not have one of the entered values.
11. **Does Not Contain:** Entered value must not be part of selected user attribute.
12. **Is Not Empty:** Selected user attribute must not be null.
13. **Does Not Equal:** Allows one value to be entered. Entered value must not be part of selected user attribute.
14. **Does Not Start With:** Entered value must not be the first part of a selected user attribute.
15. **On or After:** Used to set a specific date and dates in the future.
16. **On or Before:** Used to set a specific date and dates in the past.
